G-MAC RAS Camera Digitizer

Capture

The G-MAC RAS consists of a camera suspended from the ceiling, mounted to a table, on a magnetic board or attached to a free standing boom. A simple Automatic calibration step ensures that the picture is always precise. Place multiple pattern pieces on a table or board. With one mouse click the camera shoots a picture and the G-MAC RAS automatically digitizes!

For maximum efficiency, new pieces can be immediately placed on table/board, while another user makes edits on the G-MAC RAS software.

Edit

The digitized pattern automatically appears on the screen. A live window on the sidebar shows the real-time camera view of the table. Simple tools are provided for editing including: combining pieces, smoothing lines, mirroring pieces, adding notches, drill holes, seam lines and more. Other options include grading tools, internal lines detection and marker mode.

The G-MAC RAS saves both the pattern image and the digitized lines. Interface is user friendly. Takes minutes to learn!

G-mac RAS Digital Input CAD V1.0

G-mac RAS Digital Input CAD , quickly import the physical sample or paper pattern into accurate CAD file through two modes: digital camera photography or linear scanning.

Set input device, basic size and positioning information.

- Import digital photos, automatic recognition, manual fine-tuning.
- Recognize pattern photo to create pattern e-file for modifying.
- Recognize paper pattern contour through camera digitizer, flatbed scanner or digital camera, accurate and high efficient.

Application Scenario 1

Spread the printed Black/White grid paper on the workbench and fix the camera on the top of paper.

Application Scenario 2

Through the Camera Digitizer, recognize pattern photo to create the pattern CAD file.

Application Scenario 3

Fix the printed grid graph paper on the wall and fix the camera on front side.

Export

The G-MAC RAS is compatible with all major CAD/CAM systems, including Accumark Gerber, Micromark, Polygon, ASTM, Audaces, Lectra (IBA), Lectra (MDL), Investronica, Tukatech, IMA Genius, Optitex, Assyst, FK, Moda01, DXF, Solidworks, Rhino, Cutworks, PatternSmith, Browzwear, Clo3d and AutoCad. The G-MAC RAS can also export HPGL/Plot, PDF and JPEG files.

After you are done digitizing, your patterns are saved to disk or on your network. The files can then easily be opened in your existing CAD / CAM software.

Advantages:

- With one camera click users can automatically digitize multiple pattern pieces.
- G-MAC RAS is flexible being perfect for thick pattern materials, paper, metal, fabric, plastic, leather and cardboard.
- Guarantee Accuracy.
- Affordable digitizing.
- Flexible Background Sizes.

Digitizer CAM Price Quotation

No.	Description of Goods	Quantity	Unit Price	Total Price
1.	G-MAC RAS Camera Digitizer (Made In China)	1 Set	2,40,000 Tk	2,40,000 Tk
			Discount	50,000 TK
			After Discount Total	1,90,000 TK

Taka (In Words): One Lac Ninety Thousand Taka Only (Excluding VAT/TAX).

Terms and Conditions:

- *Delivery Time 12-14 Working Day.*
- *No Shipment Coast.*
- *Machine “Two years” service Warranty.*
- *Digitizer One Year Full parts warranty.*
- *Payment: 100%-Cash or Cash Check Pay on Delivery.*
